About

The Covid-19 pandemic that has occurred in Indonesia since March 2020 has resulted in the government having to impose restrictions on community activities, to prevent the spread of the covid 19 virus. Restricting community activities is not just limiting study and gathering activities but includes limiting business activities. The existence of restrictions on business activities will certainly result in a reduction in employee activities, and can even result in termination of employment (PHK) due to declining financial conditions. This not only affects companies but also individuals. The termination of the contract makes many individuals lose their livelihood.

Green Sandbox Advisory (GSA) is here with the aim of helping companies and individuals recover. GSA has a philosophy like a fig tree which is a tree of life for many people. With this philosophy, we believe that we can help companies and individuals to achieve: goals, be sustainable and of course, be able to anticipate future risks.

We're here for you

— Green Sandbox Advisory
